WHY Should You License Your Dog?

California requires all dogs over the age of three months are vaccinated and licensed as a rabies control measure. However, there are other reasons why you should license your pet, such as:

- 🐾 A license provides proof that your pet has been vaccinated for rabies, which is a fatal viral disease that can be prevented by vaccination.
- 🐾 Anyone finding a lost dog can contact Animal Control and through the license number, find the owner.
- 🐾 Proof of rabies vaccinations can prove useful if your pet is involved in a bite incident.

Easy Steps to Follow for Vaccinating & Licensing

- 🐾 At the low-cost monthly clinics your dog can be vaccinated for a reduced fee.
- 🐾 A license must be purchased at the clinics when receiving the rabies vaccine.
- 🐾 You may also have your dog vaccinated by a licensed Veterinarian then purchase the license at a location listed below.
- 🐾 If your dog is altered, provide proof along with the rabies certificate with payment to the City of Bakersfield and a license will be issued.

Vaccine fees:

Rabies Vaccine: \$8.00
